PROFILE

Aspiring Front-End Developer with a robust foundation in web development, enriched by hands-on experience building responsive and user-friendly websites using HTML, CSS, JavaScript, and TypeScript. Strong educational background in Civil Engineering combined with a keen interest in emerging technologies such as Artificial Intelligence and the Metaverse. Eager to contribute to innovative web projects as a Web Development Intern, leveraging problem-solving skills and a passion for creating impactful digital solutions.

Projects:

1 - Mars Exploration Website:

- Developed a landing page concept focusing on Mars exploration using pure HTML and CSS.
- Implemented animated visuals, featuring a rotating Mars image and dynamic space background.
- Presented engaging content about Mars exploration, including interesting facts and a navigation menu.

2 - Personal Portfolio Website:

- Designed and developed a personal portfolio showcasing my skills, education, and experience.
- Integrated social media links and a downloadable resume, with smooth animations and responsive design.
- Ensured a user-friendly interface to create an engaging visitor experience.

3 - E-Commerce Homepage Project:

- Created a responsive e-commerce landing page featuring a navigation bar with search functionality and user login options.
- Designed product categories with an image slider and interactive product cards, enhancing user engagement through hover effects.

4 - TypeScript Projects:

- Developed various mini-projects(npx based), including:
 - Simple Calculator*: A functional calculator application emphasizing TypeScript usage.
 - Todos Game*: An interactive to-do list application for task management.
 - Number Guessing Game*: A fun game utilizing game logic in TypeScript.
 - Currency Converter*: An application that facilitates currency exchange rates.
 - Word Counter*: A tool designed to count words in user-inputted text efficiently.
